Accelerating Innovation: Low-Cost Access to Arm IP

Olivier Bernard

Director - High Performance IoT

April 9th 2020

The Architects of Global Possibilities

The global leader in the development of licensable technology

- R&D outsourcing for semiconductor companies

Focused on freedom and flexibility to innovate

- Technology reused across multiple applications

With a partnership based culture & business model

- Licensees take advantage of learnings from a uniquely collaborative ecosystem

1,690+

licenses, growing by >100 every year

150+bn

Arm-based chips shipped to-date

6.5bn

Arm-based chips shipped in Q3 FY2019

70%

of the world's population uses Arm technology

530+ Licensees

Industry leaders and high-growth start-ups; chip companies and OEMs

Three Biggest Hurdles with Custom Silicon Designs

- What prevents SoCs from commercial success?

Time to market

+ Time is money and a competitive advantage
Early product release means higher margins & more sales

Return on investment

+ Custom silicon is often low in production volumes, so it's key to keep upfront costs as low as possible

Development risk

+ Custom silicon design is a complex process, which can add development risk when not managed properly

Working with Arm Alleviates these Hurdles

- Proven, verified and diverse IP portfolio

Time to market

+

Accelerate development with fast and easy access to a comprehensive IP package of CPU IP, system IP and reference designs

Return on investment

+

Options to license IP at low or no upfront cost to minimize initial investment and reduce overall costs

Development risk

+

Proven and pre-integrated reference designs with out-of-box software support, substantially reducing development risk

Introducing Arm Flexible Access

- A new way to access Arm IP, tools and support

What?

Arm Flexible Access

- Freedom to innovate, evaluate and fully design with Arm IP before committing to production or licensing
- Access to a range of mature and proven IP including Cortex-A, Cortex-R, Cortex-M cores, security IP, system IP, physical IP and tools
- Design before you buy, pay only for what is used

Why?

Greater agility & innovation

- More agility to respond to market needs
- More freedom to select IP to meet your needs
- Faster time to market
- Greater opportunities to create new SoCs and build new solutions

How?

Simpler & improved lifecycle

- Pause, change, stop projects, without license payment
- Simple, straight forward business terms
- Annual fee covering design rights, tools and standard support
- Download any or all of the IP package, at any time

Launched July 2019

Arm Flexible Access

– a new customer engagement model

Standard Arm licensing

Arm Flexible Access

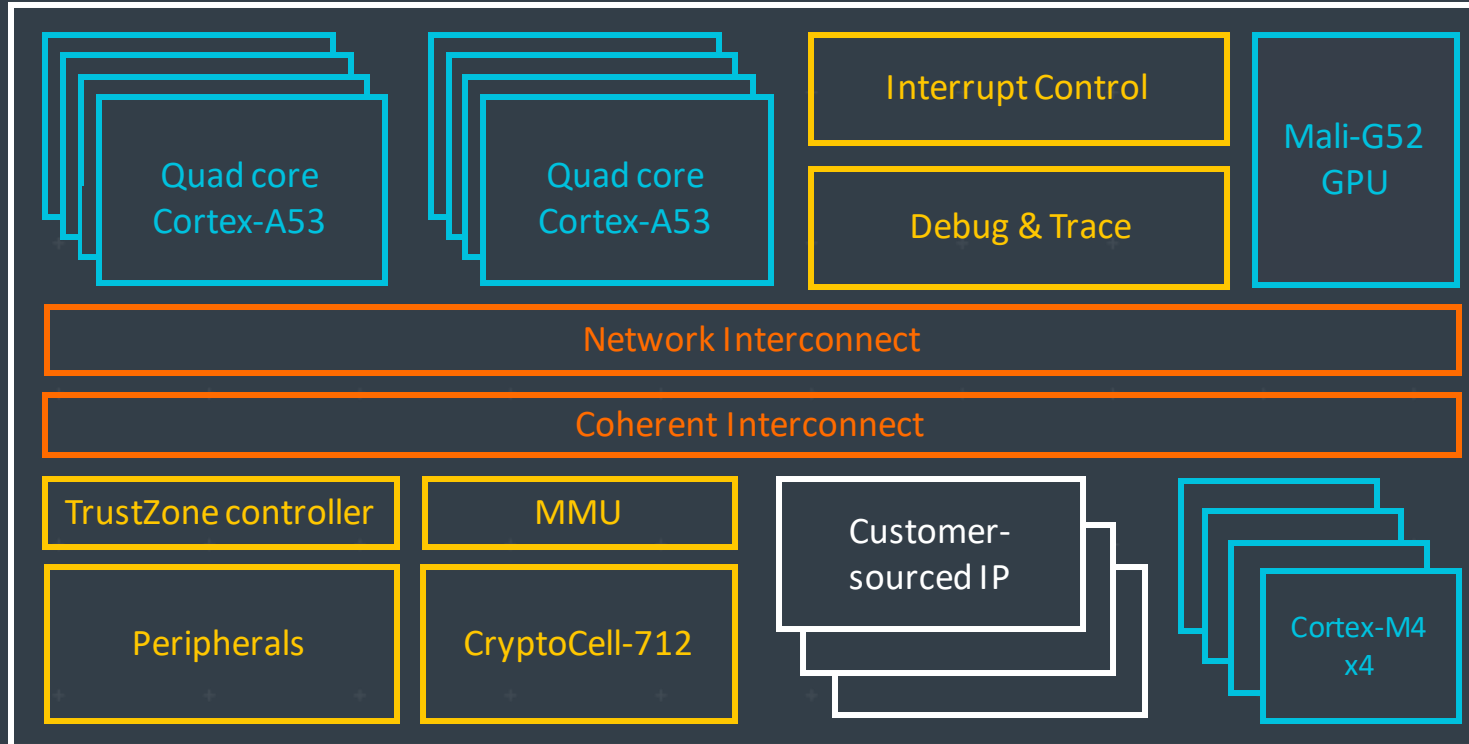

Experiment, Start, pause, parallel path

Arm Flexible Access

- Everything you need for an SoC

Use Case: Complex Application System

Complex, secure heterogenous compute system

- Multi core coherent application & GPU processing
- Leverage comprehensive Arm software ecosystem, including Arm NN for AI, Linux and Trusted Firmware
- Multiple microcontrollers for dedicated deeply embedded control
- Advanced security features

What is Included?

- Mature and proven IP

Mainstream package

Processors

- Cortex-A53
- Cortex-A35
- Cortex-A34
- Cortex-A32
- Cortex-A7
- Cortex-A5 (UP and MP)
- Cortex-R52
- Cortex-R8
- Cortex-R5
- Cortex-M33
- Cortex-M23
- Cortex-M7
- Cortex-M4
- Cortex-M3
- Cortex-M0+
- Cortex-M0

Graphics Processors

- Mali-G52
 - Mali-G31
- Also includes Mali DDKs

CoreLink Interconnect

- CoreLink NIC-450
- CoreLink NIC-400
- CoreLink CCI-400
- CoreLink CCI-500
- CoreLink CCI-550
- ADB-400 AMBA domain bridge
- XHB-400 AXI-AHB bridge

System Controllers

- CoreLink GIC-500
- CoreLink GIC-400
- PL192 VIC
- CoreLink TZC-400
- CoreLink L2C-310
- CoreLink MMU-500
- BP140 Mem. Intf
- BP141 TrustZone Mem. Wrapper

Security IP

- CryptoCell-312
- CryptoCell-712
- True Random Number Generator

Peripheral Controllers

- PL011 UART
- PL022 SPI
- PL031 RTC
- CoreLink DMA-230
- CoreLink DMA-330

CoreSight Debug & Trace

- CoreSight SoC-400
- CoreSight SDC-600
- CoreSight STM-500
- CoreSight System Trace Macrocell
- CoreSight Trace Memory Controller

Physical IP*

- Artisan physical IP platform, TSMC
- Artisan PIK for Cortex-M33, TSMC 22ULL

Corstone Foundation IP

- Corstone-101
- Corstone-201

Tools & Models

- Socrates IP Tooling
- Arm DS-Gold
- Virtual system models (fast & cycle accurate)

75%

of Arm Cortex licenses over past 2 years

Annual Access Fee - Mainstream Package Tiers

	Academia / Research	Entry	Standard
Access to IP	✓ (Except Crypto)	✓	✓
Technical support	Community based	✓	✓
Onboarding session	✓	✓	✓
Evaluation, exploration and design	✓	✓	✓
Number of tape-outs per year	Unlimited	1	Unlimited
Online training seats	5	5	25
Arm Development Studio (Arm DS Gold)	1 seat	1 seat	3 seats
Arm configuration tool - Socrates	1 seat	1 seat	1 seat
Arm virtual system models	1 seat	1 seat	2 seats
Arm Service Tokens (training/support/...)	No	Purchased separately	15 Service Tokens
	\$0k per annum	\$75k per annum	\$200k per annum

Transparent and Predictable Pricing

- Consistent and fixed pricing for all members

Annual access fee

Includes

- Access to IP, tools & models
- Design and dev rights (including FPGA proto)
- Support and maintenance for registered projects

Product licence fees

- Per-product manufacture licence fee at tape-out
- Transparent pricing
 - Simple
 - Full price list upfront
- Discount for multiple Arm IP
- Only pay for what you need

Royalties

- Per-product royalty rate
- Known upfront
- Rate applies perpetually for product configuration
- Simple flat %ASP rate
- Discount for multiple Arm IP
- Royalty calculator available

Successes and Reach

Initial engagement target exceeded > 40 Customers signed up

- 1/3 = Silicon Start ups
- 1/3 = ASIC design houses
- 1/3 = Established Silicon

Arms success is aligned with our customers' success

Where Next for Arm Flexible Access

- A live program evolving with its customer needs

More IP added every quarter – e.g.

- Functional safety packs
- Arm Cortex-M CPUs with Arm Custom Instructions
- More physical IP

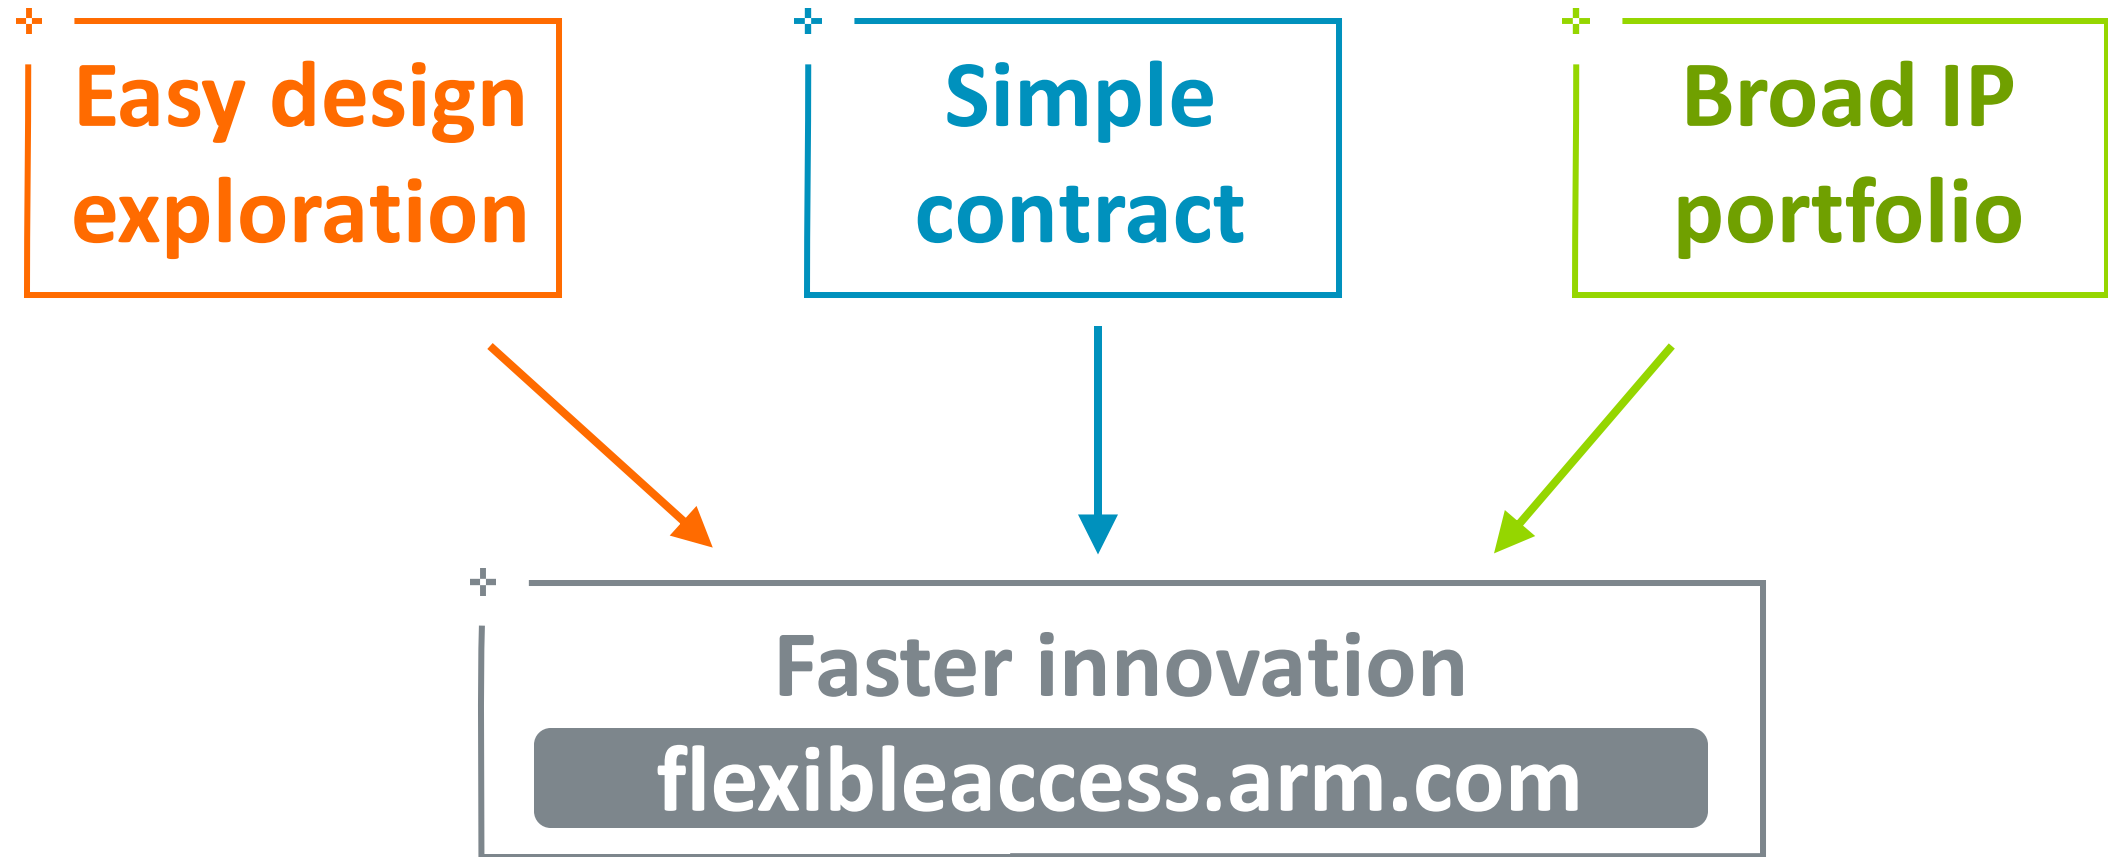

Wider industry reach:

- Interest from governmental institutions
- Collaboration with Incubators
- Other organisations who are promoting semiconductor innovation

Wave of program enhancements and extensions through next 18 months

Arm Flexible Access

- Unleashing innovation

More Ways to Access Arm Technology
